### **About the Czech & Slovak Games Week**

Czech & Slovak Games Week is an annual event hosted by the Czech Game Developers Association in cooperation with the Slovak Game Association and other partners. Its goal is to support the unique creations of Czech and Slovak developers.

This festival would not have been possible without the support of important partners, such as Arkance Systems, a leading provider of CAD, CAM, BIM and GIS solutions in the region, and Filuta AI, a Czech startup specialized in composite artificial intelligence for intelligent automatization. Czech & Slovak Games Week provides an opportunity to learn about new titles as well as watch the developers at work, gain behind-the-scenes insight into game creation, and take advantage of attractive discounts on selected titles. The event targets a wide audience – from passionate gamers to casual fans – and offers a unique chance to discover the diversity and creativity of the gaming scene in the Czech Republic and Slovakia.
